Hi-Fi by **HAI**

Bring your music out to play!

Listen to music from your living room CD player as you relax on your patio. Use your CD remote to change songs or adjust volume without leaving the comfort of your lawn chair!

Create party playlists on your PC and enjoy your tunes in the den, kitchen, or poolside!

Never miss a play! Listen to the big game throughout the house!

Bring your music out to play—in any room, from any source.

Hi-Fi by HAI unleashes music in your home! Listen to and share music on your stereo, iPod, satellite radio, digital cable TV, computer, or CD player in any room in your home.

Now music can flow freely and be enjoyed in any room, by the pool, in the backyard, or anywhere that you want it to be.

VSC Hi-Fi by HAI is a high fidelity, central Whole Home Audio system providing clear digital sound throughout the home. A sleek, wall mounted Volume and Source Control (VSC) replaces bulky components in each room, and speakers are practically hidden in ceilings and walls. The VSC features a display for volume, source and other items. Simply turn the knob to adjust volume, and push it to select source and audio options.

Hi-Fi by HAI is supplied with a remote so you can control the VSC from your easy chair. The VSC has a built-in repeater, so you can use your own remote in any room with a VSC to change channels, stations, tracks, pause, play, etc. HAI also offers a programmable remote that works with the VSC and your source equipment.

RIM The unique Remote Input Modules (RIMs) are located near your sources and make the audio available for enjoyment in each room with a VSC and speakers. The main amplifier unit is neatly mounted on a closet wall or in a structured wiring cabinet. The system supports up to 8 rooms (also called zones) and 6 sources.

Hi-Fi by HAI is plug and play with HAI home control systems so you can coordinate your music with activities in the home. Set every room to the MP3 player and preset the volumes for a party. Mute bedroom and outdoor zones when it's bedtime. Turn the entire system off when leaving the house. Select news for weekday wakeup. Use any of HAI's user interfaces to control Hi-Fi, including OmniTouch touchscreens, consoles, keypads, Snap-Link, Home Control for Windows Media Center, and Web-Link II.

Easy to operate. A single knob controls volume, source, bass, treble and balance. Anyone can use it.

High Fidelity performance that's affordable. More power and flexibility than "amplified keypad" systems at similar cost.

First built-in unit with remote input modules. Enjoy music from sources throughout the house. No audio rack required. Wiring to the main unit is hidden for a neat installation.
